INDUSTRIES

Government

Automated discovery, prioritization, and remediation tailored to the unique challenges of government IT infrastructure.

GENERAL INFO

69%
reported ransomware attacks

1M+
cost per incident

40%
attacks stemmed from known vulns

OVERVIEW

Defend government systems from persistent cyber threats

Managing security for critical public services is tough when you're under-resourced. vRx simplifies vulnerability management with automated, end-to-end remediation that works across your entire infrastructure—legacy systems included. Maintain uptime, reduce attack surfaces, and secure your services with minimal effort.

SOLUTION

Vulnerability Management for Government

Coverage for Limited Teams

With stretched resources and minimal security staff, managing vulnerabilities is a challenge. vRx automates discovery, prioritization, and remediation, enabling your small teams to efficiently tackle threats without the need for extra personnel.

Defend Critical Infrastructure

Budget restrictions shouldn't mean cutting corners on security. vRx's automated vulnerability management reduces manual effort and cost, eliminating the need for constant oversight while providing robust protection.

Safeguard Legacy Systems

Government agencies rely on legacy systems that are often vulnerable but essential. vRx's Patchless Protection shields these systems, keeping them operational and secure without disrupting critical public services.

FEATURES

Key features

Real-Time Visibility

With vRx's asset inventory and logging, gain real-time visibility into every device, application, and operating system. Track changes instantly and maintain full control of your government infrastructure from one secure dashboard.

Smart Prioritization

vRx goes beyond CVSS scores, analyzing risk over time and factoring in exploitability, business impact, and asset criticality. This tailored approach ensures government agencies focus on vulnerabilities that matter most to their mission and data integrity.

Broad Coverage

vRx offers the largest coverage across third-party applications, giving government agencies comprehensive insight into their entire software ecosystem—all from a single platform.

★★★★★

Consolidation & third-party patching is particularly valuable

With vRx, we can patch in real time, especially for our end-user systems —reducing our remediation cycle from once every three months to within the week.
