INDUSTRIES

Healthcare

Elevate your vulnerability management program with advanced remediation techniques to protect patient data and ensure compliance across your healthcare systems.

GENERAL INFO

300%
increase in cyber attacks

10M
cost per breach

194 days
to patch a critical vuln

OVERVIEW

Safeguard patient data and system integrity

With rising cyber threats and stringent regulatory requirements, vulnerability management must go beyond traditional patch management. vRx offers healthcare organizations an advanced solution for identifying, prioritizing, and remediating vulnerabilities in real-time.

SOLUTION

Vulnerability Management for Healthcare

Enhanced Compliance and Patient Trust

vRx simplifies vulnerability tracking and reporting, helping your organization meet regulatory requirements while building trust with patients by demonstrating a commitment to safeguarding their information.

Reduce Manual Processes

Manual vulnerability management can drain resources and increase risk. vRx automates discovery, prioritization, and remediation processes, allowing your IT staff to focus on strategic initiatives rather than routine tasks.

Protect Critical Healthcare Systems

Many healthcare organizations rely on legacy systems and protecting these critical assets is essential. When patches are unavailable or cannot be deployed, vRx's Patchless Protection ensures that essential systems are secured without disrupting patient care or operational efficiency.

FEATURES

Key features

Automated Remediation

vRx monitors all your assets in real-time and offers up-to-date visibility of all systems and applications. When it finds vulnerabilities, vRx automatically deploys patches and employs advanced techniques like Patchless Protection and scripting solutions to remediate them.

Smart Prioritization

Beyond CVSS, vRx analyzes various risk factors such as exploitability, impact on patient care, and regulatory requirements. This intelligent prioritization ensures your teams focus on the most critical vulnerabilities, bolstering your overall risk management strategy.

Third-Party Coverage

vRx offers extensive coverage for thousands of third-party applications, enabling you to manage vulnerabilities across your entire technology stack from a single platform. This reduces the need for multiple tools, streamlining operations and enhancing overall visibility.

★★★★★

Consolidation & third-party patching is particularly valuable

With vRx, we can patch in real time, especially for our end-user systems—reducing our remediation cycle from once every three months to within the week.
