vRadar - All-In-One Scanner

Full vulnerability visibility. Zero complexity.

Legacy scanners demand appliances, months of deployment, and still leave blind spots. vRadar delivers complete vulnerability visibility, inference-driven, lightweight, and remediation ready from day one.

Why teams switch

Coverage Without Complexity

No appliances per subnet. No architecture projects. No 6-month rollouts. Start scanning in minutes.

Cleaner Signal, Less Noise

Inference-based testing adapts dynamically, fewer irrelevant findings, more engineer confidence in results.

Remediation-First Mindset

Findings flow directly into automated patching and fixes, not ticket queues or spreadsheets.

Core scanners

PHASE 01

Discovery Scan

Finds every device on your network instantly no gaps, no guesswork, no missed assets.

✓ Live asset inventory

PHASE 02

Network Scan

Maps every open door into your environment, ports, services, and operating systems so you know exactly what's exposed.

✓ Full attack surface map

PHASE 03

Full Vulnerability Scan

A deep, end-to-end sweep that finds every exploitable weakness across your entire environment, with clear guidance on what to fix first.

✓ Prioritized CVE report

WEB APPS

Web Scanner

Uncovers vulnerabilities hiding in your web apps and APIs before attackers do, precise results, zero noise.

✓ App-layer vulnerabilities

COMPLIANCE

Compliance Scan

Instantly shows whether your systems meet the standards that matter, PCI-DSS (Internal & External), HIPAA, Cyber Essentials, CMMC, and more, with audit-ready proof.

✓ Audit-ready reports

HARDENING

CIS Scanner

CIS Level 1 & 2 benchmark scoring per system, the gold standard for configuration hardening.

✓ Hardening scorecard

How we compare

Capability	vRadar	Nessus	Qualys	Rapid7	OpenVAS
Lightweight Deployment	✓ **Minutes**	Weeks	Cloud only	Agent req.	Manual
Native Nmap Control	✓ **Full**	Internal	Internal	Internal	Partial
Dual OS Fingerprinting	✓ **Nmap + Xprobe2**	Single engine	Moderate	Limited	Outdated
CIS & STIG Built-in	✓ **Native**	Audit files	Separate mod.	Partial	SCAP dep.
Unified Remediation	✓ **Platform**	Separate	Separate	Separate	-

If your scanner requires appliances, takes months to deploy, and still leaves blind spots - vRadar fixes all of that.

MSP-READY
AGENTLESS + AGENT
MULTI-TENANT
